

Symantec AntiVirus™ Enterprise Edition

Comprehensive malware protection for every network tier in a single, easy-to-deploy solution

Overview

Symantec AntiVirus™ Enterprise Edition provides virus protection, content filtering, and spam prevention for the Internet gateway and Domino® and Exchange environments, along with virus and spyware protection for enterprise workstations and network servers. This comprehensive, easy-to-deploy solution automatically detects and repairs the effects of spyware, adware, viruses, and other malware. Side-effect repair keeps systems operational during security disruptions. A comprehensive view of clients via centralized logging, threshold alerting, and graphical reporting helps transform security data into actionable information. The solution now offers Linux® antivirus client support (Red Hat® Enterprise 3.0 - Kernel 2.4, SuSE Linux Enterprise Server 9 -Kernel 2.6, Novell® Linux Desktop 9 - Kernel 2.6).

Key benefits

- Offers an integrated suite of Symantec's award-winning Mail Security for SMTP, Mail Security for Microsoft® Exchange, Mail Security for Domino, AntiVirus Corporate Edition, and Web Security solutions
- Provides advanced, enterprise-wide virus protection and monitoring from a single management console
